[A] Conservation of energy :

The steps taken in respect of energy conservation are, provision of capacitors for electric supply system to improve power factors, replacement of sodium vapour lamps in place of mercury vapour lamps, reduction in ceiling height by providing false ceiling and insulation with thermocole wherever required, preventive maintenance, switching off power supplies during recess/lunch time. These continuous & cautious efforts have saved energy cost to the company.

[B] Technology absorption :

Form B (rule 2)

Research & Development (R&D)

The Company has a Government recognized R & D Department which is manned with well qualified personnel and equipped with Computer Aided Design System.

1. Benefit derived as a result of the above R & D: R&D efforts have helped bring out improvements in processes, product design and operating efficiencies. Indigenous development & supply of the underground mining machinery saved the country a sizable amount of foreign exchange, besides availability of machines at shorter notice.
2. Future plan of action: Continuous measures are being taken to achieve indigenisation of existing machines and efforts are put to introduce new models suitable to Indian mining conditions.
3. Expenditure:
 1. Capital : Rs. Nil
 2. Recurring : Rs.96,55,125
 3. Total R & D expenditure
Percentage of total turnover : 0.58 %

[C] Technology absorption, adaptation & innovation:

1. Efforts, in brief, made towards technology absorption, adaptation & innovation.

The technologies so far imported by the Company have been absorbed and adapted/innovated to suit them to the Indian mining conditions by the active involvement of our R & D Department.

2. Benefits derived as a result of above efforts. Absorption, adaptation & innovation of imported technology have lead to less dependence on imports of these products. This has saved a considerable amount of foreign exchange & cost of production.
3. Technology imported
 - [a] Year of Imports: The company has signed Three Collaboration Agreements as mentioned below:
 - (i) Agreement dated 2-7-2004 with Voest-Alpine Bergtechnik Ges.m.b.H., Austria for manufacture of ACM-10-continuous miner.
 - (ii) Agreement dated 12-12-2006 with Ahlmann Baumaschinen GmbH, Germany for manufacture of Front End Articulated Loader.
 - (iii) Agreement dated 12-05-2008 with Huta Stalowa Wola, S.A Poland for manufacture of 520G Wheel Loader.
 - [b] Whether technology fully absorbed: Technology for the Front End Loader is absorbed and for rest products it is in progress.

[D] Foreign exchange earning & outgo:

1. During the year the Company has exported goods worth Rs.126,859 and continues to make efforts to push up exports.

AUDITOR'S CERTIFICATE ON COMPLIANCE WITH THE CONDITIONS OF CORPORATE GOVERNANCE UNDER CLAUSE 49 OF THE LISTING AGREEMENT(S).

To,
The Members of
EIMCO ELECON (INDIA) LTD.
Anand-Sojitra Road
Vallabh Vidyanagar – 388 120
Dist. Anand, Gujarat

We have examined the compliance of conditions of corporate governance by EIMCO ELECON (I) LTD. for the year ended 31st March, 2010, as stipulated in clause 49 of the Listing Agreement of the said company with the Stock Exchanges.

The compliance of conditions of corporate governance is the responsibility of the management. Our examination has been limited to a review of the procedures and implementations thereof, adopted by the Company for ensuring compliance with the conditions of Corporate Governance. It is neither an audit nor an expression of opinion on the financial statements of the Company.

In our opinion and to the best of our information and according to the explanations given to us, and the representations made by the directors and the management, we certify that the Company has complied with the conditions of Corporate Governance as stipulated in Clause 49 of the above mentioned Listing Agreement.

As required by the Guidance Note on Certification of Corporate Governance issued by the Institute of Chartered Accountants of India, we have to state that based on the report given by the Registrars of the Company as on March 31, 2010, there were no investor grievance matters against the company remaining unattended/pending for more than 30 days.

We further state such compliance is neither an assurance as to the future liability of the Company nor the efficiency or effectiveness with which the management has conducted the affairs of the Company.

Management's Discussion and Analysis**ANNEXURE-5 TO DIRECTORS' REPORT - ITEM NO.8****INDUSTRY STRUCTURE AND DEVELOPMENT****COAL MINING**

India has a long history of viable coal mining covering almost 236 years starting from 1774 and now ranks 3rd amongst the coal producing countries in the world with coal reserves of 267.20 billion tonnes, which contributes to 6.66% of the total world reserves.

Through a sustained programme of investment and greater thrust on application of modern technologies, it has been possible to raise the production of coal from a level of about 70 million tonnes in the early 1970's to production of 524.58 million tonnes in 2009-10. But despite its huge resource base, till date, India has not been able to minimize its coal deficit at current rates of production. India's largest coal producer coal company "Coal India Limited" with a modest coal production of 70 million tonnes at its inception and increasing its production, sustaining growth, over years ended the fiscal 2009-10 with a production of 431 million tonnes and committed to produce 520 million tonnes by 2011-12.

In a bid to break the public sector monopoly over coal, the Indian Government has also introduced legislative changes allowing for private mining, whilst liberalising norms for the allocation of captive blocks permitting trading of coal. Captive block holders would also be permitted to sell their coal on the open market.

Most of the coal production in our country comes from surface mines which contribute over 90% of the total production and remaining 10% from underground mines. A number of large surface mines of over 15 million tonnes per annum capacity are in operation in our country.

About 75% of the coal in India is consumed in the power sector. In addition, other industries like steel, cement, fertilizers, chemicals, paper and thousands of medium and small-scale industries are also dependent on coal for their process and energy requirements.

According to the International Energy Agency projections, coal will remain the dominant fuel in India's energy mix through to 2030. Demand is projected to grow from 585 million tonnes in 2009-10 to 2223 million tonnes in 2030-31. The rate of growth implied in this forecast of coal demand is around 6.50% per year as against 5.2% achieved in the past 25 years.

FUTURE SCENARIO

Indian coal production reached 525 MT in 2009-10 with a contribution of 44 MT by Private Player. Coal subsidiaries of Coal India and Singareni Collieries Company Limited contribute 90% of total coal production with 473 (279 underground, 163 opencast and 31 mixed mines) and 50 (36 underground and 14 opencast mines) mines respectively. Private Mine player contribute 9.16% in India's coal production, and which was 3.7% in 2001-02. At present 90% of coal production in India comes from opencast mines which were 20% at the time of inception of Coal India Limited.

The Ministry of Coal has emphasized the production of coal from underground mines being 70 % of total reserves by introduction of modern methods/technologies of mining by replacing the existing intermediate technology with higher degrees of mechanization like, Continuous Miner Technology, Underground Drilling Machines, Remote Operated Higher Capacity of Load Haul Dump etc., which have been successfully adopted in other leading coal producer countries. This will help to increase productivity and will reduce the production cost in underground mines with higher degree of safety as well as current underground contribution of 10% in country's total coal production. This will also help to increase the recovery percentage of the coal from underground mines as in exiting Bord & Pillar methods we are unable to dig out around 35% coal.

The demand for coal was pegged by the Working Group of the Planning Commission about 730 million tonnes, while the total India's coal production around 680 million tonnes for the terminal year of 2007-12 Plan. The fuel consumption level is likely to go up with expansion of capacity of Power generation.

In order to enhance country's coal production to minimize the coal deficit, the average annual investment of Rs. 4,000 crore is expected for mining equipment out of which 50% of total investment is for material handling equipment with addition of annual average production capacity of 40 MT.

After deregulations and the reforms in the coal sector, there are considerable opportunities for private players as well as foreign investors to invest in the Indian coal sector. Coal blocks with Geological Reserve of more than 50 billion tonnes identified for allocation for captive operation, out

of which coal blocks with reserves of 41.80 billion tonnes have been allotted to public sector companies and private sector companies. A very ambitious programme of achieving 104 MT by 2011-12 from captive mining blocks is envisaged in XI five year-Plan.

At present Coal India Ltd., has a mix of manual, semi-mechanized and mechanized underground coal mines, and moving towards various state-of-the-art technologies with higher degree of mechanization. The thrust areas expected to be the replacement of the intermediate technology with higher degrees of mechanization like, Continuous Miner technology, Underground Drilling Machines, higher capacity of Load Haul Dump etc.

In order to enhance its production, Coal India Ltd., has also indentified 122 coal projects for the eleventh five year plan period with an ultimate capacity 295 mtpa. Of these, 31 are underground mining projects and 91 are opencast ones. About 24 projects with a capacity of 64.35 mtpa are in various stages of implementation.

Coal India Ltd. has worked out a capex plan of Rs 18,000 crore to be invested during the Eleventh and Twelfth Plan periods for implementing fresh 119 coal mining projects across the country. Coal India Ltd. plans to raise production to 520.5 million tonnes by the end of the Eleventh Plan. In the Twelfth Plan period, it has projected a target production of 664 million tonnes.

Your company is being pioneer in Underground Mining Equipment and was first to replace manual Bord & Pillar methods with intermediate Bord & Pillar method in India long back, and also took a timely decision to meet challenges of future by introduction of state-of-the-art equipment like Continuous Miner, underground Drills higher capacity of remote controlled Loading equipment etc. for mechanization of underground coal mines in India for higher productivity with minimum operational cost.

Your company has already entered into a new area of manufacture of mining equipment for surface mining operation and has already supplied 5 nos. 160mm Rotary Blast Hole Drills as an established manufacturer. This new area of business would also result in increased business commensurate with the growth of the segment.

NON – COAL MINING

An investment of the order of Rupees 250-500 billion is expected in the Indian mining sector in the next five years with focus on certain key minerals like copper, zinc, uranium, iron ore, manganese, bauxite and limestone. It is expected that copper, zinc, gold, uranium

and manganese should continue to do well in the current financial year.

As was mentioned earlier, your company had entered into marketing arrangement with European manufacturer for bigger capacity of Dumpers and Loaders and in future your Company has plan to go for manufacture of these higher capacity sophisticated mining equipment in India to contribute further towards mechanization of Indian underground Mines.

CONSTRUCTION

In India construction equipment business has started booming after the recession period is over. The loader market is expected to grow to a level of 7,500 machines in 2010 which was only 2500 machines in 2007.

As per projects information government has planned to invest Rs.16,00,000 million on national highways and Rs.13,50,000 million on state highways from 2010 to 2021.

The size of the loader that your company has selected is most suitable for road construction segment, especially to handle crushed stone, which is the basic raw material for road construction. There is also enormous scope of our loader in ready mix plants, solid waste management and grain handling in shipyards.

Further it is also interesting to note that the value of construction in particular infrastructure construction is expected to grow by +128% over the next decade in the world as per reports released by some authentic agencies. In India being an emerging country, construction is the second largest economic activity after agriculture. Construction accounts for nearly 65 per cent of the total investment in infrastructure and is expected to be the biggest beneficiary of the surge in infrastructure investment over the next five years.

FUTURE SCENARIO

India's booming infrastructure sector is fuelling demand for all kinds of construction equipment. Before the opening up of the Indian economy, and the entry of international majors, much of infrastructure development and construction in the real estate sector was done manually. But with the infrastructure and construction sectors undergoing dramatic changes – with 60-storeyed sky-scrapers being built in cities like Mumbai, and thousands of kilometers of expressways and highways being laid across the subcontinent - builders and contractors are acquiring sophisticated equipment to execute the multi-million-dollar projects. For the

construction equipment sector, which has adapted rapidly to the changed scenario, this is indeed good news, as it paves the way for an exciting future.

Construction industry is expected to witness effective investment over Rs.10,000 billion during the 11th five year plan. The biggest chunk of this, 29% will be in power, followed by 21% in railways and 18% in roads and bridges. Construction is the second largest economic activity in the country next to agriculture. In 2007-08, Construction sector contributed about 8.5% to the country's GDP. Over past 3 years, construction as a percentage of GDP has increased from 8.0% in 2005-06 to 8.5% in 2007-08. The multiplier factor between growth rates of construction and GDP has been about 1.5X-1.6X.

The construction equipment is among the main beneficiaries of the boom in construction. Construction equipment constitutes the biggest component of construction costs only after construction materials, which is the 30-50% of the total cost. The present size of construction equipment industry is Rupees 107 billion and has grown at a rate of over 30%. The industry is further expected to grow at a rate of 15-20% over the next year.

Wheel Loaders are commonly used in construction, civil engineering and quarrying sectors for handling materials around sites. There are various reasons for the growth in Loaders market, the most fundamental being the economic reforms and the expansion of private contractual work in the mining and quarrying sectors, change in working habits with the use of mechanical handling replace manual labor.

OPPORTUNITY AND THREATS

Your company has got the approval for regular manufacture & business of 160mm Rotary Blast Hole Drills for opencast coal mines operations. Your company has already launched state-of-the-art Wheel Loader Model AL 120 in previous financial year and now set to launch bigger size of Wheel Loader, this will inflate the business in this new segment for your company and will also reduce the company's dependency on government client to considerable extent in future. In the current financial year, your company is going to start the regular production of Model ACM 10 Continuous Miner for Underground Coal Mines. Your company has already completed successfully field trials of Model 611 Underground Drill and in the current financial year going to manufacture for regular supply to coal companies.

The implementation of most modern manufacturing process has reduced the throughput time, generated additional machinery capacity without any additions. Along with this, the alternate source of procurement for brought-out items resulted in optimizing our manufacturing cost of some of our products.

Threat will continue to hover from International Mining Equipment manufacturers consequent to Globalization. These manufacturers are planning to establish their presence in India. We are planning to combat this threat by optimizing resources.

OUT LOOK FOR THE COMPANY

With the all-round revival of coal companies and introduction of state-of-the-art technologies products for mining sector and as-well-as for construction sector, your company is expected to do better in the coming years.

RISK AND CONCERNS

Since most of the new products are in the introductory stage, the main risk and concern of the company remains that it is almost entirely dependent virtually on Government client for some more time.

The product is being introduced for construction sector, is first in its class in the country and has to create market for itself, where it has to compete with low priced & lower technology products.

Your company, at the moment, is catering to the requirements of institutional customers namely the mining companies. With the introduction of Loader for Construction application your company would be expanding its customer base from institutional to individuals. In order to cater to the enlarged customer segment we need to create extensive distribution network. The creation of effective distribution network throughout the country would take a little longer time and therefore gestation period for realising sales of sizable quantities of construction equipment may be slightly longer.

INTERNAL CONTROL SYSTEM

The Company's internal control systems are adequate, considering size and nature of operation of the company, to meet regulatory/statutory requirements.

DEVELOPMENTS ON HUMAN RESOURCE/ INDUSTRIAL RELATIONS FRONT

Company attaches utmost priority to human resource development with focus on regular upgradation of the

knowledge and skills of all employees and equipping them with the necessary expertise to meet the challenges of change and growth successfully. The company continuously monitors its manpower requirement to ensure that it has adequate human skills commensurate with its needs. Industrial relations of the company continue to be cordial.

DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE AND OUTLOOK.

Sales & Other income for the year ended 31st March, 2010 were Rs.1645.65 million as compared to Rs.1480.78 million on 31st March, 2009. The net profit stood at Rs.128.02 million (previous year Rs.152.27 million).

**NOTES FORMING PART OF THE ACCOUNTS****SCHEDULE - 14****(1) SIGNIFICANT ACCOUNTING POLICIES****[A] BASIS OF ACCOUNTING**

The Financial Statements are prepared as per historical cost convention and in accordance with the Generally Accepted Accounting Principles in India, the provisions of the Companies Act 1956, and the applicable Accounting Standards notified under the Companies (Accounting Standards) Rules, 2006. All Income and Expenditures having material bearing on the Financial Statements are recognized on accrual basis.

[B] USE OF ESTIMATES

The presentation of the Financial Statements in conformity with the Generally Accepted Accounting policies requires, the management to make estimates and assumptions that affect the reported amount of Assets and Liabilities, Revenues and Expenses and disclosure of contingent liabilities. Such estimation and assumptions are based on management's evaluation of relevant facts and circumstances as on date of Financial Statements. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

[C] FIXED ASSETS AND DEPRECIATION

Fixed Assets are recorded at cost of acquisition / construction less accumulated depreciation and impairment losses, if any. Cost Comprises of purchase price and any attributable cost of bringing the assets to its working condition for its intended use, but excluding Cenvat / Service Tax / VAT credit availed. Where the construction or development of any such asset requiring a substantial period of time to set up for its intended use, is funded by borrowings if any, the corresponding borrowing cost are capitalized up to the date when the asset is ready for its intended use.

Depreciation has been provided on Plant & Machinery on the straight-line method at the rates specified in Schedule XIV of the Companies Act, 1956.

For all other assets depreciation has been provided on written down value method at the rates specified in Schedule XIV of the Companies Act, 1956.

An asset purchased on or after 1st April 1993 and where the actual cost does not exceed Rs.5000/- is depreciated at the rate of 100%.

Intangible assets are shown at Cost of Acquisition less accumulated amortisation. Technical Know-how is amortised on Straight Line Method over the best estimated useful life of the assets.

[D] INVESTMENTS

Long Term investments are valued at cost less provision for diminution other than temporary, in value if any as at the Balance sheet date.

[E] INVENTORIES

Inventories are stated at Cost or Net realisable value whichever is lower after considering credit of VAT and Cenvat.

Cost of raw-material, Spares and Components is determined on weighted average cost.

Cost of work in progress includes cost of raw material, appropriate share of labour and manufacturing overheads and valued at lower of cost and net realisable value.

Finished Goods are valued at lower of Cost including excise duty payable thereon or Net realisable value.

[F] REVENUE RECOGNITION

Sales are stated net of rebate and trade discount and excludes Central Sales Tax, State Value Added Tax. With regard to sale of products, income is reported when practically all risks and rights connected with the ownership have been transferred to the buyer's. This usually occurs upon dispatch, after the price has been determined.

All the items of expenses and income are accounted on accrual basis, except Dividend Income, Insurance claims & Commission received which are accounted on receipt basis.

NOTES FORMING PART OF THE ACCOUNTS**SCHEDULE - 14****[G] OPERATING LEASE**

Lease revenue under operating Lease are recognised as income on accrual basis, in accordance with the respective Lease agreements.

[H] EMPLOYEE BENEFITS**(i) (a) Short Term**

Short Term employee benefits are recognized as an expense at the undiscounted amount expected to be paid over the period of services rendered by the employees to the company.

(b) Long Term

The Company has both defined contribution and defined benefit plans, of which some have assets in approved funds. These plans are financed by the Company in the case of defined contribution plans.

(c) Defined Contribution Plans

These are plans in which the Company pays pre-defined amounts to separate funds and does not have any legal or informal obligation to pay additional sums. These comprise of contributions to Employees Provident Fund. The Company's payments to the defined contribution plans are reported as expenses during the period in which the employee perform the services that the payment covers.

(d) Defined Benefit Plans

Expenses for defined benefit gratuity payment plans are calculated as at the balance sheet date by independent actuaries in the manner that distributes expenses over the employees working life. These commitments are valued at the present value of the expected future payments, with consideration for calculated future salary increases, using a discounted rate corresponding to the interest rate estimated by the actuary having regard to the interest rate on Government Bonds with a remaining term i.e. almost equivalent to the average balance working period of employees.

(e) Other Employee Benefit

Compensated absences which accrue to employees and which can be carried to future periods but are expected to be encashed or availed in twelve months immediately following the year end are reported as expenses during the year in which the employees perform the services that the benefit covers and the liabilities are reported at the undiscounted amount of the benefits after deducting amounts already paid.

(ii) Voluntary Retirement Scheme

Voluntary Retirement compensation payments are charged to the Profit & Loss Account during the year in which they are incurred.

[I] EXCISE DUTY

Excise duty payable on production and custom duty payable on imports are included in the value of finished goods, both in respect of goods cleared and lying in Bonded warehouse.

[J] FOREIGN CURRENCY TRANSACTIONS

Foreign Currency transactions are recorded in the reporting currency by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transactions. Foreign Currency Monetary items are reported using the closing rate. Non Monetary items which are carried in terms of historical cost denominated in foreign currency are reported using the exchange rate at the date of transaction.

Exchange differences arising on the settlement of monetary items or/on reporting a company's monetary items at rates different from those at which they were initially recorded during the year or reported in previous financial statements are recognised as income or as expense in the year in which they arise.

Monetary assets & liabilities denominated in foreign currency remaining unsettled at the year end are translated at closing rates.

The premium or discount arising at inception of forward exchange contract is amortised as expense or income over the life of the contract. Exchange difference on such contract is recognised in the statement of profit and loss account.

NOTES FORMING PART OF THE ACCOUNTS**SCHEDULE - 14****[K] BORROWING COST**

Borrowing costs are recognized in the period to which they relate, regardless of how the funds have been utilized, except where it relates to the financing of construction or development of assets requiring a substantial period of time to prepare for their intended future use. Interest on borrowings if any is capitalized upto the date when the asset is ready for its intended use. The amount of interest capitalized for the period is determined by applying the interest rate applicable to appropriate borrowings.

[L] PROVISION , CONTINGENT LIABILITIES AND CONTINGENT ASSETS

A provision is recognized when the Company has a present legal or constructive obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding long term benefits) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognized but are disclosed in the notes to the Financial Statements. A contingent asset is neither recognized nor disclosed.

[M] TAXATION

- (a) Provision for Current Tax is made as per the provisions of the Income Tax Act, 1961.
- (b) Deferred Tax resulting from "timing differences that are temporary in nature" between accounting and taxable profit is accounted for, using the tax rates and laws that have been enacted as on the Balance Sheet date. The deferred tax asset is recognised and carried forward only to the extent that there is a reasonable or virtual certainty, as the case may be, that the asset will be realised in future.

[N] EARNING PER SHARE

The basic earnings per Share is calculated by dividing the Net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year.

Diluted earning per Share is calculated by dividing net profit attributable to equity Shareholders (after adjustment for diluted earnings) by average number of weighted equity shares outstanding during the year.

[O] CASH FLOW STATEMENT

The Cash Flow Statement is prepared by the "indirect method" set out in Accounting Standard 3 on "Cash Flow Statements" and presents the cash flows by operating, investing and financing activities of the Company.

Cash and Cash equivalents presented in the Cash Flow Statement consist of cash on hand and other current account balance / deposits with banks.

[P] IMPAIRMENT OF ASSETS

The carrying value of assets of the Company's cash generating units are reviewed for impairment annually or more often if there is an indication of decline in value. If any indication of such impairment exists, the recoverable amounts of those assets are estimated and impairment loss is recognized, if the carrying amount of those assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the estimated future cash flows to their present value based on appropriate discount factor.

[Q] PRODUCT WARRANTY EXPENSES

Product warranty expenses are determined based on Company's historical experience and estimates are accrued in the year of Sale.
